

Wang Yuhui (Elvin), FRM

Singapore | (+65) 8679 1885 | yuhui.wang.elvin@gmail.com | elvinwangyh.github.io

Macro and cross-asset researcher at a Singapore single-family office. Builds the models and agentic AI pipelines behind the analysis, then translates the results into clear investment writing. FRM charterholder; Python/ML engineering from data pipeline to published review.

Professional Experience

Foresight Pivot Pte. Ltd. (formerly Horizon Storm Operation Pte. Ltd.), Single-Family Office

Apr 2024 – Present

Business Analyst

- **Monthly macro review:** author of the firm's end-to-end monthly review covering US macroeconomic conditions, cross-asset dynamics, thematic analysis and trade recommendations, produced through an agentic AI research pipeline I designed and built.
- **Thematic research coverage:** research support for an investment book concentrated in the AI compute value chain — US semiconductors and China data-centre infrastructure — and digital assets, linking macro, policy and sector developments to thematic exposure.
- **Return attribution and factor analysis:** decompose portfolio returns and factor exposures to identify emerging risks through macro and asset-specific transmission channels; present findings to the portfolio manager to inform hedging decisions.
- **Hedging analysis:** proposed a DV01-neutral long-breakeven hedge (TIPS vs. nominal Treasury ETF pairs) against inflation risk from the oil-supply shock ahead of the initial wave of Middle East conflict; built a cross-asset correlation-regime analysis to characterise the prevailing macro environment and assess whether crypto exposure required asset-specific rather than index-level hedging.
- **Trade execution:** execute equity and options trades using limit and algorithmic orders to manage transaction costs and liquidity, including the firm's portfolio-wide options hedge (US\$100m notional, two rounds, c. US\$2m total premium).

Independent Research & AI Systems

Personal research platform (self-funded: own data, compute and tooling)

Dec 2020 – Present

- **Agentic research pipeline:** designed and built the monthly review pipeline deployed at work (LLM skill files, persistent research state, automated HTML publication), plus an AI-assisted strategy documentation workflow separating code extraction from narrative synthesis.
- **Macro Review Desk:** building a public research site presenting the full research pipeline end to end — macro, cross-asset and thematic coverage — written for a non-specialist reader (launching September 2026).
- **Quantitative models:** GDP nowcasting (bridge equations benchmarked against GDPNow) and data-release event studies; options-implied term-structure factor model, DCC-HMM regime detection and a real-time implied S&P 500 equity risk premium engine, run across hundreds of symbols.

Internship & University Achievements

Deutsche Post DHL Group, Express Regional Business IT

Jan 2023 – Jun 2023

Digitalisation Analyst, Intern

- Built API and Alteryx data pipelines feeding Power BI dashboards for regulatory compliance and operational efficiency.
- Translated operational requirements into a prototype offline shipment-processing application (company API, Google AppSheet, Zapier), working with external technology partners including Google to evaluate new tools.

University Competitions & Projects

2020 – 2023

National University of Singapore

- **CME Group University Trading Challenge (2020, 2021):** formed and led team; mean-reversion and momentum strategies returned 40%, ranked 1st among Singapore teams.
- **NUS capstone:** led a medium-term crypto trading strategy using GARCH models and variance-ratio tests (Grade A+).

Education & Certifications

Financial Risk Manager (FRM), GARP

Jun 2026

GARP member, FRM charterholder | GARP ID: 1409823

National University of Singapore

Aug 2019 – Dec 2023

Bachelor of Business Administration (Honours), Business Analytics and Finance

Anglo-Chinese Junior College

2017 – 2018

GCE A-Level: Distinctions in General Paper and Project Work

Skills

- **Languages:** Python, R, SQL
- **AI / ML:** PyTorch, TensorFlow, scikit-learn, PyCaret; LLM agent workflows, prompt and skill architecture
- **Quant / Data:** pandas, NumPy, SciPy, statsmodels, Dask, Arrow/Parquet, Plotly, Streamlit, CUDA RAPIDS
- **Cloud / BI:** AWS, GCP, Azure; Power BI, Alteryx, Excel/Google Sheets
- **Spoken:** English, Mandarin (native); basic French and Japanese
